

“THE TITANIC WOLVES”

A FAMILY OF WOLF GHOSTS live in the Artic Sea in the wreck of the Titanic. The wolves belonged to the sea captain. Now, they live in an enchanted forest that you can only get to through one of the portholes of the Titanic. There are eight ghost wolves in the family. Cody is the father wolf. Emily is the mother wolf. They have six puppies, who are very mischievous, and often get into trouble. They like to run around, biting each other’s ears and chasing each other’s tails.

On the other side of the enchanted forest, a volcano erupts and causes a fire to break out. The volcano is too far away for the ghost pack to notice but the fire grows more and more . . .

What happens next?
